

# PACIFIC OCEAN

## FOR YOUR SAFETY

### High Tide

Check the tide tables before walking on the beaches. Rising water can trap you against a cliff with no possibility of escape.

### Tsunami Hazard Zone

If you feel an earthquake, think "tsunami!" Go to high ground or inland and stay there.

### Heavy Surf

Very large, powerful "sneaker" waves can occur at any time. They will quickly pull you into the water and survival is unlikely. Never turn your back on the ocean.

### Steep Cliffs

Cliffs are likely to crumble and slide. Climbing on them or walking near the edge invites catastrophe. Because of falling rocks, walking below cliffs is dangerous. Keep away!

### Falling Limbs

Tree limbs can fall during high winds, especially in old-growth forests.
